PROFESSIONAL SUMMARY

Frontend Developer with 1+ year of experience shipping production-ready interfaces across SaaS platforms, CMS websites, and content products. Delivered 5+ client projects at Desisle LLP from raw concept to live product across B2B SaaS, finance education, and resource management tools. Skilled in React, Next.js, WordPress, and Framer with full ownership of implementation, testing, and launch quality.

TECHNICAL SKILLS

Frontend Technologies: HTML, CSS, SCSS, Bootstrap, JavaScript, React, Next.js, Tailwind CSS

Backend & Database: PHP, MongoDB

CMS & No-Code Tools: WordPress, Framer, ACF (Advanced Custom Fields)

UI Libraries & Design: shadcn/ui, Figma

Tools & Platforms: Visual Studio Code, Bitbucket, Git, OpenAI, Electron.js

PROFESSIONAL EXPERIENCE

Frontend Developer | Desisle LLP

Feb 2025 – Present | Bangalore, India

- Build responsive, high-performance web interfaces across client projects including SaaS platforms and CMS-based websites.
- Convert UI designs into production-ready interfaces with clean, maintainable, and scalable frontend code.
- Develop WordPress and Framer projects end-to-end, from initial setup and implementation to final launch.
- Create and document reusable components, development workflows, and project structures for future reference.
- Take independent ownership of project requirements, responsiveness, performance, and final delivery quality.

Key Projects:

Finance Tale — Content Platform — React, Tailwind CSS, MongoDB, shadcn/ui, Figma, Bitbucket

- Built the landing page and React product UI from a raw concept into a structured, credible interface with no initial design direction.
- Ran end-to-end testing across user flows to ship production-ready features with clean navigation and reading experience.

Gulf Conglomerate Website — Custom WordPress — HTML, CSS, PHP, Bootstrap, WordPress, ACF, Bitbucket

- Delivered the complete frontend for a custom WordPress site, owning HTML/CSS, ACF configuration, and PHP bug fixes.
- Documented each section and editing flow enabling the client's non-technical team to manage content updates independently.

Curious Designer — Bookmark & Resource Manager — React, Next.js, shadcn/ui, Tailwind CSS, JavaScript

- Took a React/Next.js designer utility from codebase to live product, handling deployment, bug fixes, and end-to-end QA.
- Verified authentication, bookmark saving, collection management, and retrieval flows for a polished user experience.

Web Development Intern | Nexus Info

Jul 2024 – Aug 2024 | Remote

- Built a complete frontend project independently within the first week of the internship.

- Developed a full stack project covering both frontend and backend logic over 3 weeks, connecting interfaces with backend APIs.
- Delivered within set timelines while working with real project requirements across the full development cycle.

PROJECTS

Productive+ — *Electron.js Desktop Productivity Application*

- Engineered a Windows-compatible Electron.js app with a persistent screen-edge overlay enabling distraction-free 1-hour focused work cycles without interrupting the user's active workflow.
- Built an hourly progress prompt system that captures task updates at each work cycle, creating a structured accountability loop throughout the workday.
- Implemented a pause-tracking engine requiring reason logging on every pause, recording pause duration separately from active work time for accurate productivity measurement.
- Developed an end-of-day summary generator that compiles hour-wise work entries and total productive hours into a structured daily report.
- Designed and shipped a full-stack browser-based dashboard with authentication, enabling users to review daily and weekly productivity trends across sessions.

EDUCATION

Bachelor of Engineering — Electronics and Instrumentation Engineering (EIE)

Dr. Mahalingam College of Engineering and Technology, Pollachi, India

Nov 2021 – Apr 2025
